

GP Centralizer - GWA -22'

The GP adapter acts as a centralizer extending the guiding length for most types of guideposts

- Reliable design with simple functions
- Integrated Imenco Guidewire Anchor (GWA-22'-SS) and incorporated upper receptacle
- Structural anchoring parts from high strength stainless steel providing high side load capacity
- Built-in compliance feature to reduce load peaks from impacts acting sideways. Earlier lead in and pre-guiding before guidepost entry
- The lower anchor must have a Release sleeve/Safety sleeve ROV and Shear-pin release possibilities with low release force
- Can be stabbed by its own weight assisted by ROV
- Re-stabbing of non-fractured shear-pin.
- No fragments of pin or parts are left subsea
- Compatible to guideposts with top receptacle for most common types of guidewire anchors
- Interfaces IMENCO Anchors, both slimline and standard
