

Utility Stations

Our Utility Stations have provision for HP hot water, fresh water and Plant Air

Imenco's Utility Stations is designed and manufactured on both standard requirements and special needs from clients. Hose reels will normally be installed inside enclosure to protect hoses from wear and tear from environmental conditions.

For stations operating in climate below zero degrees there will be installed EX rated heater in cabinet and heat tracing on tubing. Complete stations are built in SS316L with Offshore Aluminum enclosures.
