

Control Panels & Motor Starters for Safe and Hazardous areas

We can deliver
customized cabinets in
very short time

Imenco build, assemble and certify various control panels & motor starters, control system cabinets and more. Pure relay controlled or PLC controlled applications suited for hazardous areas or other harsh environments. We have our production facility located near Haugesund in Norway and can deliver customized cabinets in very short time. We can assist making electrical wiring diagrams, GA Layout drawings etc. in Autocad and other electrical documentation.
