

Pressure Refuelling Nozzles

To be able to maintain pressure refuelling at all times – you should at least have 2 nozzles available

The Pressure Refuelling Nozzle is only used in some areas of the world, meaning many installations don't have the equipment available. Should you suddenly need this kind of nozzle, we can offer these for rent.

Pressure Refuelling Nozzles

If you choose to purchase these nozzles, you will be required to purchase at least 2 pcs, since they need to go onshore for recertification every year. The advantage with hiring the nozzles is that you will only have to pay rental cost of one The Pressure Refuelling Nozzle, and Imenco will automatically send you a new one just before the installed nozzle is ready for inspections.
